

HUNTER LANGEMO FOR SGA PRESIDENT

WHO? WHAT? WHY?

My name is Hunter Langemo, and I am thrilled to announce that I am running to serve as **your** SGA President. As an Aerospace Engineer major from Olympia, WA, I am so grateful for the opportunity I have had serving as **your** SGA Treasurer. I have so much passion for SGA and have never enjoyed a position so much. I would give up anything and everything for the opportunity to serve again. It is my calling to serve in this position to **give the people what they want!**

WHAT HAVE I DONE?

As your Treasurer, I have done everything in my power to **give the people what they want!** I negotiated with the Assistant Director (AD) of Athletics and the Chief Business Officer (CBO) of the Prescott Campus to **extend the gym hours** to close at midnight on weekdays. Many ROTC cadets, Athletes, and other students benefit, and engage safely by operating at lower densities. I worked with SGA to **expand club funding** from \$1,500/year to \$2,000/semester, giving the thousands of students in clubs and organizations maximized opportunities. This Fall, I also **founded the Student Treasury Executive Board**, which conducts research to best **innovate the student experience**. We discovered what the **people really wanted** by conducting a survey with over 300 responses.

From this survey, the vast majority of students strongly desired a **recycling program**, from which I have worked with Prescott College, the Sustainability Committee Chair, and the Regional VP of Sodexo to create a plan. A majority of students also expressed interest in **residence hall printers**, which I have collaborated with the Directors of Housing and Residence Life (HRL) and Information Technology (IT) to make this a possibility. I collaborated with our CBO, our AD of Athletics, and Director of Intramurals to bring a **free recreational, hiking, and fishing equipment service** to students. In addition, students have displayed so much excitement about the idea of a **skate park**, so I have also collaborated with the Directors of Facilities and Risk Management to explore this project as a campus improvement. These numerous interactions with administrators have taught me the delicate balance of diplomacy and advocacy for student interests.

WHAT DO I PLAN TO DO?

As your President, I plan to focus on key issues that students **want** to see acted on. I lost an immediate family member to suicide at a young age. 35% of college students suffer from a mental illness. I find it paramount to innovate our **mental health awareness** by **increasing awareness, opening conversations** and **implementing campus-wide programs**. But this is just one issue and I am just one student. To effectively serve as a voice for 3000 students, I have spent weeks having conversations with as many students as possible to **listen to their concerns**.

Title IX comes up in a plurality of these conversations, escalating as a priority for SGA. We **must** ensure that all students feel safe, listened to, and feel trust extended to them, whether that happen through **accountability**, adjusting **University Sexual Misconduct policies**, **education of resources**, **more effective trainings**, and/or **constant conversations** with administration in charge.

Students have called for **transparency** with administrative communications. With my experience working with administrators, I strive to foster unity between students and administration to rebuild trust without sacrificing student representation. Students have brought forth many concerns regarding housing, in particular, that I find an **SGA HRL Representative** as the best opportunity to cement a connection and best communicate 1400 student concerns to the right individuals. With communication, I also plan to reach students via survey for Student Union considerations, Board of Trustees reports and any other important decisions directly impacting the student body.

MOVING FORWARD TOGETHER

Given my SGA Executive experience, dedication, and compassion for the students, I am confident that I am the best choice to serve as **your** SGA President. Vote for me, and we will work **together**, as one mind, one body, one family. **WE can give the people what they want**. But we can only do this **together**.
